

Whether its the dripping humidity of the tropics, or the cold fog of temperate and mountainous regions – this is the simple answer to condensation, mould and mildew problems.

Introduction

Any location that traps moisture, such as wardrobes, cupboards and other enclosed spaces, will encourage the formation of harmful condensation.

Whether living in the dripping humidity of the tropics, or the cold fog of temperate and mountainous regions, we've all known the musty odours and mildew over our clothes and shoes.

Since 1960, when the first Cynebar cupboard heater dehumidifier was designed and manufactured, we've successfully solved the numerous problems caused by condensation, mould and mildew.

How moisture affects your printer and photocopier

Moisture absorbed by printer and photocopier paper can be a major reason for poor quality copies and 'paper jams'. Condensation also damages many other items such as books, electrical circuitry, photographs, pianos and other musical instruments.

This Australian made cupboard heater and dehumidifier is the simple solution

Solve the problems caused by condensation with a product that is inexpensive to run, compact and doesn't require replacing, draining or chemical refills.

Cynebar Cupboard heaters carry no risk of burns or fire and are safe around children and pets.

Robustly designed with a rust-resistant, powder coated metal body, the cupboard heater is maintenance free and guaranteed for five years.

The Cynebar cupboard heater will provide many years of trouble free, economical and effective use, ensuring complete protection for all applications.

There are three models available – the one you select will depend on local conditions and the size of the area to be protected. The cupboard heater is designed and manufactured in Australia by Cynebar.

Performance Capabilities

Inventory Code	Specification
CYN1100000	25 Watts @ 240V
CYN1100001	40 Watts @ 240V
CYN1100002	60 Watts @ 240V
CYN1100003	25 Watts @ 240V with 2m Cordset installed
CYN1100004	40 Watts @ 240V with 2m Cordset installed
CYN1100005	60 Watts @ 240V with 2m Cordset installed

Applications

- Anti-mildew for Clothes & Shoes
- Photocopy Paper Cabinets
- Electrical Switchboard Heating
- Photograph Protection
- Comfort Heating of Reptiles

FEATURES AND BENEFITS

- Rust-resistant, powder coated metal body
- Guaranteed for five years
- Can prevent paper jams in printers and photocopiers
